Discover Timeless Beauty with HARDAM

Dears!

At Hardam, we take immense pride in our journey and the vision that continues to drive us forward. Founded on the principles of innovation, resilience, and dedication, Hardam began as a small endeavor and has since evolved into a thriving enterprise with a strong legacy. Over the years, we have worked tirelessly to create solutions that empower communities, support growth, and redefine excellence in our industry.

This company profile serves as a testament to the milestones we've achieved together and the future we are building. At Hardam, we are not just shaping a company; we are creating a legacy of innovation and progress for generations to come. We believe our future is bright, fueled by the hard work of our teams, the trust of our partners, and the support of our valued clients.

As we continue this journey, I invite you to learn more about Hardam—our values, achievements, and ambitions for a better tomorrow. Together, we can achieve remarkable things.

Thank you for being a part of our story.

Sincerely,

S. Ahmed Bradosty
Hardam CEO

Strategic Projects

Water Injection Project

We are proud to announce the successful implementation of the first Water Treatment and Injection Project in the Kurdistan Region of Iraq (KRI), adhering to the highest international standards. This project integrated the latest theories, advanced technologies, state-of-the-art equipment, and sophisticated software. Completed in December 2024, the project was delivered to the client after achieving over 1,000,000 working hours without any casualties or damage to personnel, the environment, or assets.

Basara DAM

Construction of the Basara Concrete Dam in Sulaymaniyah

The Basara Concrete RCC Dam project, the first RCC dam in Iraq, aims to harness significant water resources from the Basara River and its surrounding areas, particularly during the rainy season. In addition to water collection, the dam is designed to generate electrical power, contributing to the region's energy needs. This project is one of the strategic initiatives of the Kurdistan Regional Government (KRG), focused on reserving and managing water resources in the Sulaymaniyah Governorate.

AGL Building at Erbil International Airport

The AGL building at Erbil International Airport features a modern design that meets the relevant requirements for airport facilities. Its cargo road is specifically tailored to enhance operational efficiency and support the overall functionality of the airport.

THE CHALLENGES

The importance of the project was the reason to complete this project within short time besides it was located in a difficult location logistically wise. It was location closed to landing zone.

Construction of Haj Omran International border and customs compound in Erbil Governorate

Hardam Company takes pride in having constructed the most modern and advanced international customs and border facility at Haji Omeran, North Erbil. We successfully completed the entire infrastructure required for this international border, including customs offices, state-of-the-art facilities, extensive parking areas, service buildings, cargo handling areas, internal roads, and more. Additionally, we provided comprehensive entrance and exit customs services, as well as robust security and administrative support, ensuring a seamless and efficient border experience.

even MORE..

Aqre Water Treatment Project

The Aqre Water Treatment Project is poised to become a benchmark for modern water treatment and supply systems in the region. This cutting-edge facility is designed to purify water sourced from the Great Zab River, employing the latest advancements in water treatment technology, including advanced filtration, sedimentation, and disinfection processes. With a capacity to produce 4,500 cubic meters of potable water per hour, the plant will significantly enhance the availability of clean water for the city of Aqre and its surrounding villages. This initiative not only aims to meet the immediate water needs of the communities but also focuses on sustainability and environmental protection by ensuring that water is treated efficiently and responsibly. The project includes the construction of extensive distribution networks to ensure reliable delivery of treated water, along with monitoring systems to maintain water quality standards. Additionally, the facility will incorporate renewable energy sources to power operations, further contributing to its sustainability goals. Scheduled for completion in the last quarter of 2025, the Aqre Water Treatment Project represents a vital investment in public health and infrastructure, aiming to improve the quality of life for residents while supporting the growing population in the region."

Headquarters Building of the General Directorate of Water Resources

The construction of the Headquarters for the General Directorate of Water Resources in the Kurdistan Region of Iraq (KRG) represents a significant advancement in infrastructure. This modern multi-floor building has been meticulously designed to meet the evolving requirements

His excellency, Minister of Municipality and Tourism accompanied with high KRG delegation visited Aqre Water Treatment project on 17th November 2019.

Redesigning Basara Dam

The Basara Dam redesign is complete. A group of companies identified significant risks in the original design by an international firm for the Government of Iraq, leading to a revised plan that includes relocating the dam body nearby. Construction is set to begin in June 2019.

Haji Omeran infrastructure

Haji Omeran border gates. The project includes two giant gates at the entrance and exit of the border complex where it involves facility rooms for access and security services. The project included road connection, parking lots, and other administrative facilities.

Smart Solutions, Powerful Results.

HARDAM has been proudly engaged in various activities since the second half of 1991. This active role of HARDAM Co. has gained it a large experience and a very well-established reputation of being a reliable company both inside the Kurdistan Regional Government (KRG) and outside the KRG areas.

Engineering Excellence for a Sustainable Future

Hardam is a leading company dedicated to delivering innovative, reliable, and high-quality engineering solutions. With expertise in construction, electrical, and mechanical engineering, General trading we specialize in building resilient infrastructure, powering industries with cutting-edge electrical systems, and providing precision-driven mechanical solutions. Our commitment to excellence, sustainability, and technological advancement ensures that we meet the highest industry standards while exceeding client expectations.

At Hardam, we don't just build structures; we engineer lasting success, shaping a future of efficiency, safety, and innovation.
